# Scenario and target user

AIMCooP is a member-owned savings-and-credit cooperative headquartered in Aurora, Zamboanga del Sur (CDA Reg. No. 012090030). It reports 1.2 million+ members, PHP 3 billion+ in assets and 83 offices across Luzon, Visayas and Mindanao, with allied businesses in funeral services, rice and copra. Its public departments are the Marketing, Operations and Support Groups.

As part of the proposed ERP (Phase 2 — HR/payroll), AIMCooP needs one place to run payroll for its internal employees. Every semi-monthly cut-off, data from 83 offices moves through five hand-offs; a delay at any step delays everyone's pay.

**Employee** → **Attendance** → **Payroll calculation** → **Approval** → **Payroll record**

## Target user

| | |
|---|---|
| **Role** | HR & Payroll Supervisor, AIMCooP Head Office |
| **Responsibilities** | Collect attendance from all offices, decide leave and overtime, run payroll, and submit it to the HR Manager and Finance. |
| **Key decisions** | What must be fixed before the cut-off locks? Is payroll within budget? Will it be released on time? |
| **Skill level** | Comfortable with HR systems and spreadsheets; not an analyst. Needs plain numbers and direct actions. |
| **Also used by** | Branch Managers, who see the same screen limited to their own office. |

02

# Goal and supporting questions

PRIMARY GOAL

Release an accurate, on-time payroll for every employee each cut-off, while keeping attendance, overtime and cost under control across all 83 offices.

QUESTION 1

Which offices or employees have attendance, leave or overtime exceptions that could delay this cut-off?

QUESTION 2

Is payroll cost, including overtime, within budget — and what is driving any increase?

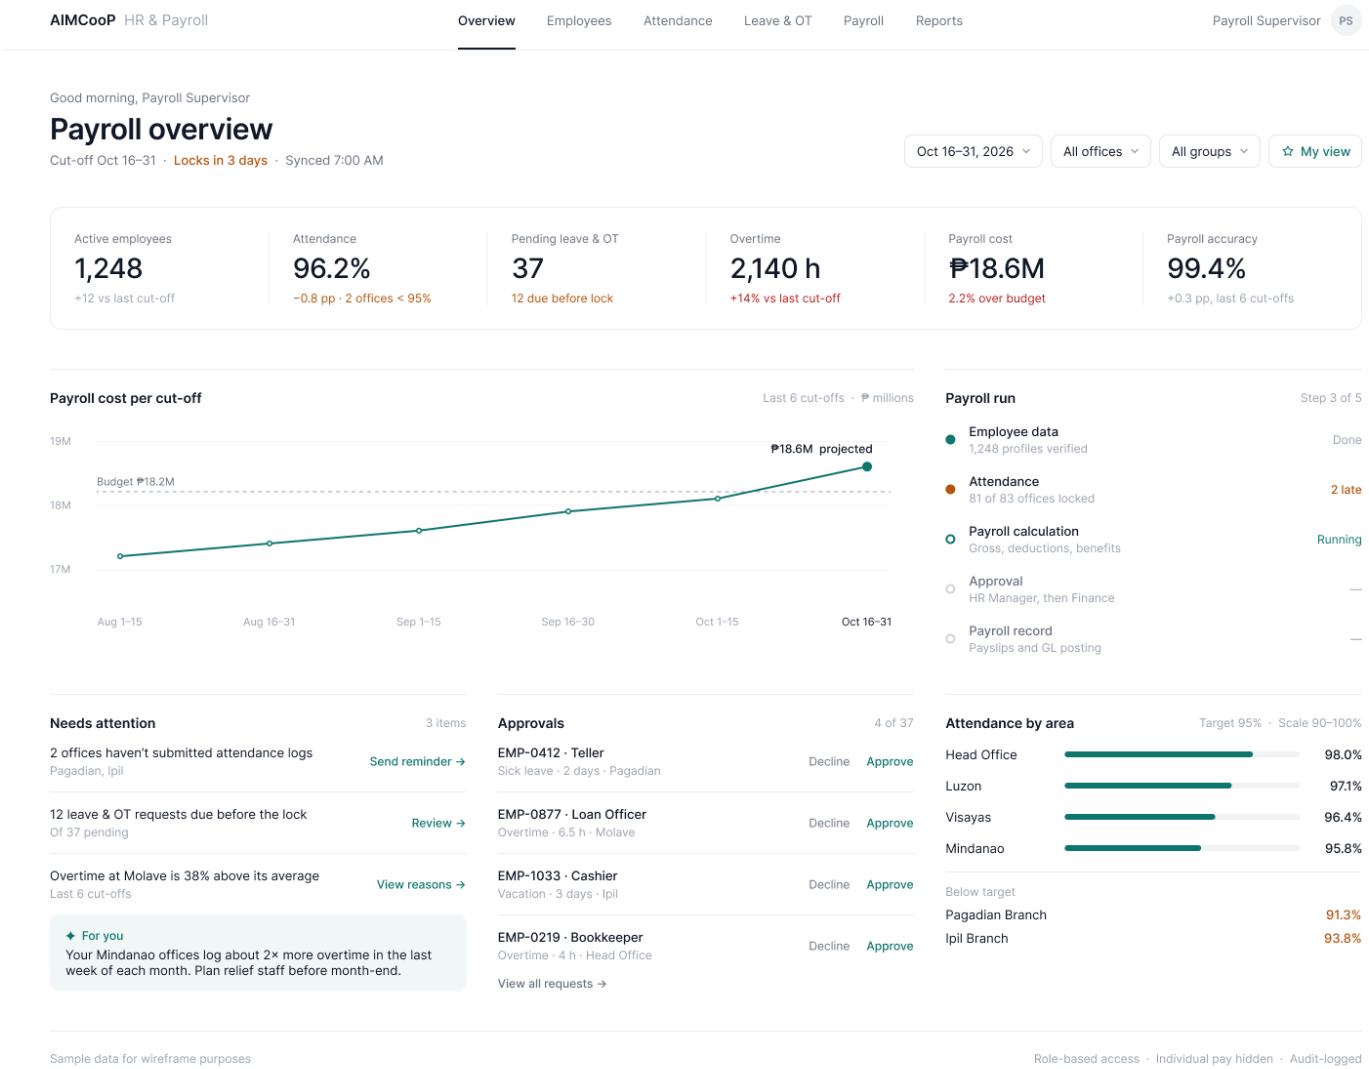

03

# Key performance indicators

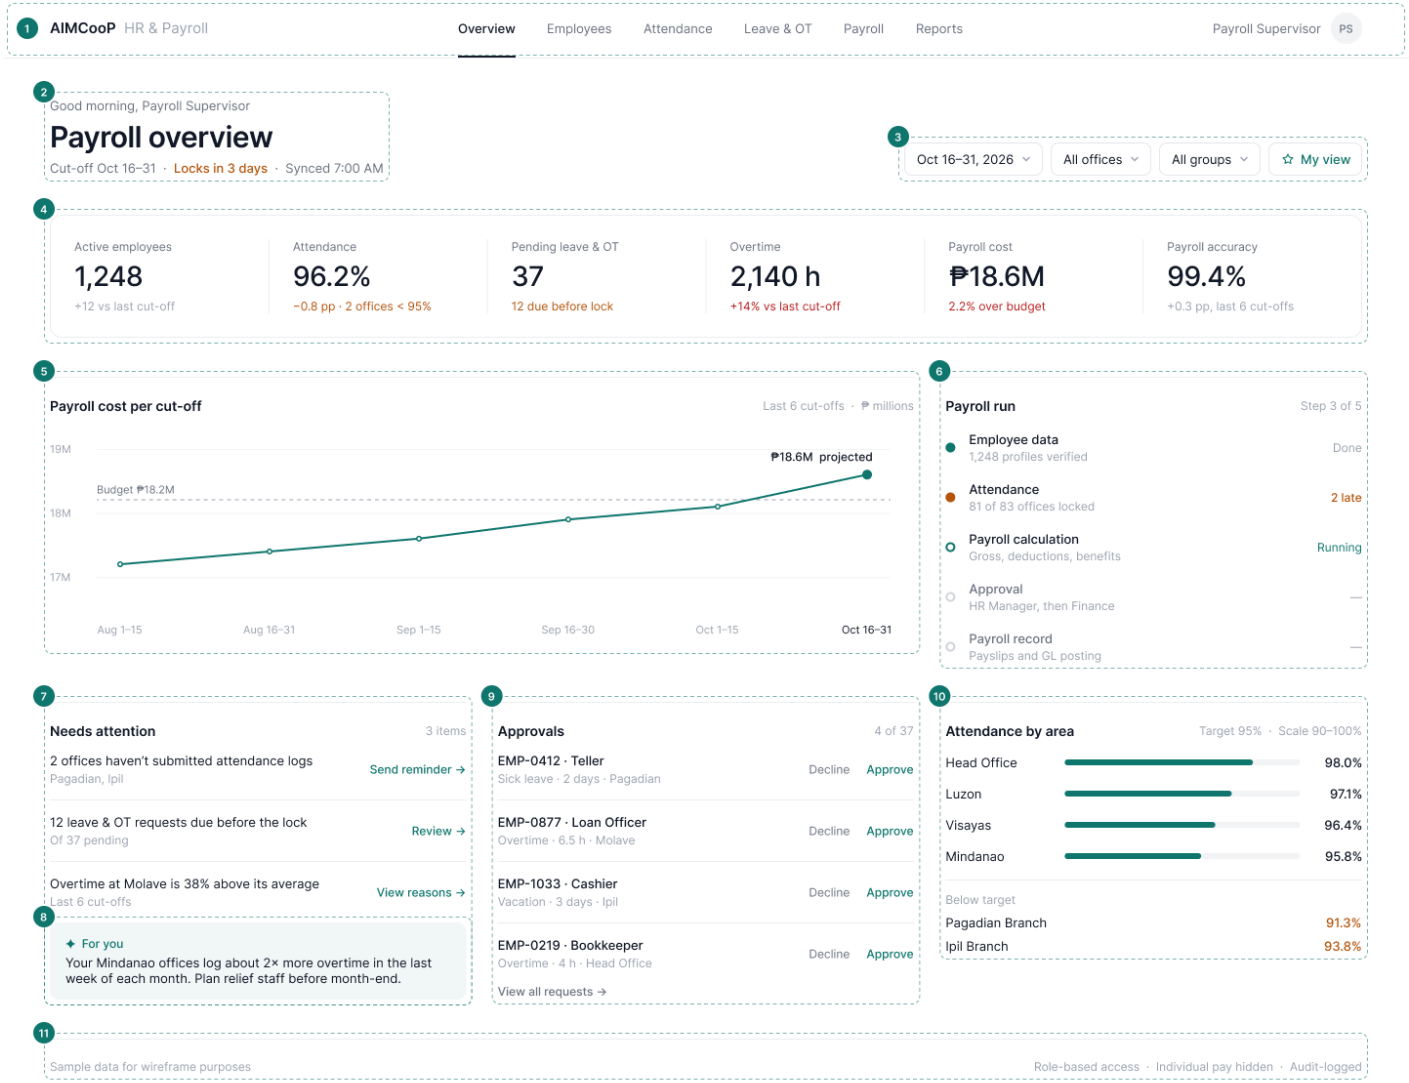

| KPI | DEFINITION | PURPOSE | SAMPLE |
|---|---|---|---|
| **Active employees** | Employees with active status at cut-off end. | Baseline: payroll covers everyone it should. | 1,248 |
| **Attendance** | Days present ÷ scheduled workdays. | Flags absenteeism and missing logs. Target ≥ 95%. | 96.2% |
| **Pending leave & OT** | Requests not yet approved or declined. | Unresolved requests block calculation. | 37 |
| **Overtime** | Approved OT hours vs. previous cut-off. | Controls OT cost; reveals understaffing. | 2,140 h |
| **Payroll cost** | Gross pay + contributions + benefits vs. budget. | Answers question 2. | ₱18.6M |
| **Payroll accuracy** | Payslips without correction ÷ total, last 6 cut-offs. | Quality of the process. | 99.4% |

Values are illustrative sample data.

# Wireframe — labelled

04

# Layout labels

| # | ELEMENT | TYPE | PURPOSE |
|---|---|---|---|
| 1 | App bar & navigation | Navigation | Module tabs: Overview, Employees, Attendance, Leave & OT, Payroll, Reports. |
| 2 | Greeting & countdown | Personalized header | Greets the user and shows days until the cut-off locks and data freshness. |
| 3 | Period · Office · Group · My view | Filters | Scope the whole screen; "My view" restores the user's saved filters. |
| 4 | Six KPIs | Cards | Status at a glance; change text is colored only when it needs attention. |
| 5 | Payroll cost per cut-off | Chart · line | Trend across 6 cut-offs against a dashed budget line. |
| 6 | Payroll run | Status tracker | Employee → Attendance → Calculation → Approval → Record, with status per step. |
| 7 | Needs attention | Alerts | Three prioritized issues, each with one action link. |
| 8 | For you | Personalized insight | A pattern found in the user's own offices, with a suggestion. |
| 9 | Approvals | Table · action | Pending leave and OT by employee ID; approve or decline inline. |
| 10 | Attendance by area | Chart · bar | Areas against the 95% target; offices below target listed underneath. |
| 11 | Footer | Trust | Sample-data note, role-based access, pay hidden, audit-logged. |

05

# Personalization

ROLE-BASED VIEW

The Supervisor sees all 83 offices; a Branch Manager sees only their own office and staff.

GREETING & COUNTDOWN

The header speaks to the user and counts down to their next deadline, so the most urgent fact is read first.

MY VIEW

Saved filters (e.g. Mindanao · Operations Group) reopen in one click.

FOR YOU

Insights are generated from the user's own offices and always end with a suggested action.

06

# Metric → action

| METRIC | WHEN | ACTION |
|---|---|---|
| **Attendance** | An office is below 95%, or has not submitted logs. | **Send reminder** to the Branch Manager, verify logs, lock attendance before cut-off. |
| **Pending leave & OT** | Requests still open within 2 days of the lock. | **Review** and approve or decline; escalate unsupported requests to the department head. |
| **Overtime / Payroll cost** | OT up more than 10%, or cost over budget. | **View reasons**, check staffing, flag the variance to Finance before approval. |

07

# Design rationale

START FROM THE DECISION

Every element answers one question: can this cut-off's payroll be released accurately and on time? Anything that didn't inform an action was removed.

COLOR MEANS SOMETHING

The screen is neutral by default with one teal accent for actions. Amber and red appear only as text, and only where something needs attention — so problems stand out within seconds.

STRUCTURE THROUGH SPACE

Hairlines and whitespace replace boxes, shadows and badges. Fewer containers means less to read and a clearer hierarchy: header → KPIs → trend and process → what to do.

RIGHT CHART, NOTHING EXTRA

A line for cost over time with a dashed budget reference; thin bars to compare areas against a target; a simple stepper for the payroll process.

PRIVATE BY DEFAULT

Only aggregated pay is shown. Approvals use employee IDs and positions, access is role-based and audit-logged, in line with the Data Privacy Act.

Share-out

# One choice, one trade-off

DESIGN CHOICE

The payroll run tracker sits beside the cost trend. The supervisor's biggest risk is a late step blocking everyone's pay; "Attendance · 2 late" shows exactly where to act.

TRADE-OFF

Minimalism means less on screen: no headcount breakdown, only four approvals, no individual pay. Detail is one click away in the Employees and Leave & OT tabs. We traded completeness for a screen that can be read in ten seconds.

08

# Checklist

| CRITERION | QUESTION | OUR DESIGN |
|---|---|---|
| **User fit** | Designed for a named role? | HR & Payroll Supervisor; Branch Manager via roles. |
| **Goal alignment** | Every KPI tied to an objective? | All six serve on-time, accurate, within-budget payroll. |
| **Visual clarity** | Priorities visible in 10 seconds? | Neutral screen; color only on exceptions. |
| **Actionability** | Do alerts suggest a next step? | Every alert has an action; approvals are inline. |
| **Personalization** | Relevant filters and insights? | Role view, countdown, My view, For you. |
| **Trust & privacy** | Definitions, freshness, access? | KPI definitions, sync time, role-based access. |
